PROFESSIONAL SUMMARY

IHK-Certified Frontend and Full Stack Developer based in Berlin, with a background in Graphic Design and Media. Specialized in building pixel-perfect, mobile-first interfaces using React, Next.js, TypeScript and Tailwind CSS. An eye for details, combining visual design thinking and hands-on engineering - from Figma prototype to deployed full stack application. Delivered 4 end-to-end projects during a one-year intensive Weiterbildung at Syntax Institut, including a production-ready e-commerce platform with Stripe, PostgreSQL and admin dashboard. Seeking a junior-to-mid frontend or full-stack role at a start-up or product team in Berlin or remote, where design quality and technical execution both matter.

WORK HISTORY

- Deputy Media Director** 2019 - 2021
BMC - Bawar Media Center, Afghanistan (RMIC-AT Bundeswehr)
- Directed cross-functional media operations across web, print, video and radio sections coordinating workflows of these 4 teams
 - Owned SEO strategy and CMS management for web publishing, improving content discoverability and digital reach
 - Led concept development for digital campaigns, translating editorial goals into structured content pipelines
 - Trained and mentored junior team members in content creation, production workflows and digital publishing standards
- Reporter & Text Editor** 2017 - 2019
BMC - Bayan-E-Shamal Media Center, Afghanistan (RMIC-AT Bundeswehr)
- Researched, wrote and edited high-accuracy articles under tight deadlines in English and Persian
 - Coordinated video production team including raw footage management, editing workflow to final delivery
- English Lecturer** 2017
Kawun University, Mazar-E-Sharif, Afghanistan
- Delivered English language instruction to university-level students and contributed to curriculum development for the English department
- Reporter & Text Editor** 2012 - 2013
Ayna TV, Kabul, Afghanistan
- Produced & hosted a political talk show, managing guest coordination, editorial direction and live delivery | Also covered live events and edited contents of editorial team, maintaining accuracy and publication standards

PROJECTS

- Bestsellers - Full Stack E-Commerce Bookstore** 2026
- Built a production-ready full-stack bookstore with server-side rendering, dynamic search and filtering, wishlist, and customer reviews
 - Integrated Stripe for secure checkout and Next-Auth for session-based authentication
 - Designed and built a custom admin dashboard for inventory and order management
 - Seeded product data via Open Library API and managed relational schema with Prisma ORM and PostgreSQL (Neon)
 - Automated transactional email notifications using Google SMTP and deployed to production on Vercel
- Tech Stack:** Next.js, React, TypeScript, Tailwind CSS, Prisma ORM, PostgreSQL, Stripe, Next Auth, Vercel
- [Live Vercel](#) [Subdomain](#) [GitHub Repo](#) [Figma Prototype](#)

2025 | NIRVAN - VEDIC YOGA (My First Project)

- Designed a 30-screen high-fidelity Figma prototype with a full design system components, typography, spacing and color tokens
- Implemented the full design in code with pixel-perfect accuracy, mobile-first responsive layout and cross-device consistency
- Built reusable component architecture and integrated live data via JSON API
- Maintained visual consistency and accessibility standards throughout - documented in a public case study

Tech Stack: HTML5, CSS3, JavaScript, JSON APIs, Figma
